Those standards require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether the financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements. The procedures selected depend on our judgment, including the assessment of risks of material misstatement of the financial statements, whether due to fraud or error. In making those risk assessments, we consider internal control relevant to the Trust Fund's preparation of financial statements that give a true and fair view in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Trust Fund's internal control. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of accounting estimates made by the Trustees, as well as the overall presentation of the financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

The Trust Fund does not have formal financial risk management objectives and policies in place. However, financial risk management is practiced informally based on the personal judgement of the trustees.

The main risk arising from financial instruments and controlling of such risk is set out below: -

Liquidity and cash flow risks

The Trust Fund actively manages its debt maturity profile, operating cash flows and the availability of funding so as to ensure that all refinancing, repayment and funding needs are met. As part of its overall prudent liquidity management, the Trust Fund maintains sufficient levels of cash to meet its working capital requirements.

(b) Fair Values

The method and assumption used to estimate the fair values of each class of financial instrument are as follows: -

Cash at bank

The carrying amount of cash at bank approximates its fair value due to the withdrawals of this financial asset.

Accruals

The carrying amount of accruals is reasonable estimate of fair value because of its short maturity.
